Annexure-IV

Sub: Evaluation Of Tender

The evaluation of the tenders shall be on the basis of lowest landed cost based on the quoted C&F price of the parties' ex-designated disport with comparable credit period and techno-commercial consideration/preference.

The following procedures of loading / unloading of the price shall be applicable.

1. Effect Of Free Credit Period:

The prices offered on C&F basis shall be worked out on sight basis for all the parties. If some of the parties have offered rates with interest free credit period, the same shall be worked out at sight basis as follows:

$$P = \frac{A}{1 + \frac{NR}{100}}$$

P = Principal Amount (US\$)
A = Amount (Rs.)
N = No. Of Years
R = Percent Rate Of Interest

If the price quoted is with 30 days credit, to convert the same to sight terms 'N' will be 1/12. The rate of interest can be considered from the offer itself if indicated by the party. Alternatively, the rate of interest shall be assumed as Secured Overnight Financing Rate SOFR + 0.5% service charges.

2. Effect Of Discount:

If the party has offered quantity discount or any discount for that matter, the same shall be reduced from the price worked out on sight per MT.

3. Effect Of Discharge Rate Variation:

NIT provides discharge rate in MT for individual ports. The parties are supposed to quote based on the NIT discharge rates only. In case the discharge rate quoted by the parties is higher or lower than the rates provided in the NIT, the price shall be suitably increased or decreased as per the following sample calculations:

- a) Discharge Rate As Per NIT = 2,000 MTPD
- b) Shipment Size = 30,000 MT
- c) Discharge Rate Quoted By The Party = 2,500 MTPD
- d) The discharge rate quoted may have any suffix such as SHEXEIU / SHEXUU

The following assumptions are made:

- 1) Vessels carrying around 18,000 MT of cargo dem/des rate US\$ 4,000 / 2,000
- 2) Around: 30,000 MT US\$ 6,000 / 3,000
- 3) Around: 50,000 MT US\$ 8,000 / 4,000

SHEXEIU

A week has 168 hours out of which 44 hours are not accounted by the ship owners, even if used, even though we use 168 hours in a week, the time accounted is only 124 hours. Hence if the number of hours worked is more than 124 hours, an additional benefit of 44 hours automatically is achieved. Hence the total free time can be calculated by multiplying the time by 1.35 (168 / 124).

Example:

$$\frac{30000}{2000} \times 1.35 - \frac{30000}{2500} \times 1.35 = 20.25 - 16.2 = 4.05 \text{ days time lost.}$$

General Terms & Conditions (GTC) of NIT

@ US\$ 6,000 per day $4.05 \times 6,000 = \text{US\$ } 24,300$ on 30,000 MT i.e. US\$ 0.81 PMT

The loss of time due to higher discharge rate demanded by the party is 4.05 days. As the vessel owner is giving lesser time, the vessel is bound to incur demurrage. Assuming the demurrage rate of US\$ 6,000 MTPD, the total demurrage shall work out to US\$ 0.81 PMT. This amount of US\$ 0.81 shall be added to the C&F rate of the party who is offering a discharge rate of 2,500 MT as against NIT terms of 2,000 MTPD. If the party offers lesser discharge rate than indicated in the NIT, similar calculations will be made. However, instead of demurrage rate of US\$ 6,000 despatch rate, US\$ 3,000 shall be considered for calculations. This will be subtracted from the C&F rate offered by the party. However, if the time saved based on NIT rate and offered rate is 4 or less number of days, this will not be multiplied with the time factor of 1.35 but time saved will be multiplied directly with the despatch rate.

4. Effect Of Variation In NOR Terms At Disport:

Our NIT is based on FERTICON Charter Party terms i.e. the time to count 24 hours after acceptance of NOR at the disport for C&F contract. Some parties are offering GENCON Charter Party terms which state time to count from 08.00 a.m. from the next working day, in case the NOR is tendered afternoon. If the NOR is tendered before 1200 noon, the time to start from 01.00 p.m. of the same day. This reduces the free time allowed by 19.00 hour or less. This may lead to demurrage at disport.

The effect is worked out as follows:

$$\frac{19}{24} \times \frac{6,000}{30,000} = 0.15 \text{ US\$ PMT}$$

Based on the assumption of demurrage at US\$ 6,000 PD for a shipment size of 30,000 MT. This amount shall be added to the C&F price in case the party has not accepted NOR terms as in the NIT.
